

Old media vs new media

Old media: TV, newspapers, radio, mail, books, magazine,

New media: internet, social networks, websites, Email, Blogs, streaming services, ...

Advantages/Disadvantages:

Old media

- Adv: mostly factual news
- Adv: high availability
- Adv: low-cost production
- Adv: local audience (radio)
- Div: maybe time-dependent
- Div: hard to get specific audience (newspaper)
- Div: message expires immediately (TV, radio)
- Div: mostly consumed by older generation
- Div: no specific target groups except magazines

New media

- Adv: you can use it everywhere and every time on smartphones
- Adv: huge amount of information and variety
- Adv: fast and reliable
- Adv: messaging services
- Adv: easy for advertisements
- Div: personal data is collected
- Div: internet bubble (you only see the content that is picked for you)
- Div: hacking
- Div: fake news, spreading false information
- Div: Cyber-Mobbing
- Div: risk for addiction
- Div: manipulation

The new media is growing and replaces the old media, but not definitely. The modern society loves the flexibility. Everywhere and at every time you can go on social media, look for information or even watch any movie or series. The young generation already grows up with smartphones and the internet, they are not interested in old media.

Consequences/Dangers:

- Addiction
- Cyber-Mobbing
- Social anxiety
- Fake News

A big problem is the handling with the new media. Young people often don't know the risks and dangers or even how to use them properly. This should be taught, but the older generation also have problems with the understanding and handling.

Also, every data on the internet is stored and can't be deleted complete, therefore everyone should think twice what to write or post.
